

# \$BID by Predictcoin

BID is an exclusive token by Predictcoin, a crypto-assets price prediction DAO. BID token holders will exclusively be able to bid to gain access to the Predict Pools on Predictcoin without predicting and even after predictions are over.

Predictcoin focuses on building products that works and innovate, while maintaining our core values of uniqueness and exclusivity. Our products are built to gain traction, gamify and decentralize the blockchain and financial world.

One of such product, the Price Prediction V1 is a unique flagship product and the world's first crypto-assets price prediction DAO rewarding winners and losers. PREDers must predict on the available coins on Monday 13:00 UTC to 14:00 UTC to gain access to the Predict Pools, failure to do that they have to wait till next week. Winners can exclusive earn PRED at high APR, while losers can exclusively earn BNB at high APR. However, it's limited to only 50 seats a week to keep the APR high.

## The Predict \$BID

With only 50 seats, it gets filled within minutes, because let's face it, anyone who got a seat will get value. We reckon people use several wallets to predict and secure their seats to increase their chances of earning more.

Hence, to give more people a chance, every week 2 user stand a chance to gain access to the main PRED (Predict Pool) and the other the BNB (Pool) without predicting. All they need to do is bid with \$BID, just like an auction. The highest bidder will be able to gain access to the PRED Pool, while the second in ranking gets access to the BNB Pool.

When they gain access to the pools, they still need PRED to earn their rewards. Users can stake up to 100 PRED to earn their rewards for the week (7 days), before the next round begins.

# Tokenomics

The total capped supply of **\$BID** is **10,000,000** making it a deflationary digital currency.

# Deflationary

\$BID is a true deflationary digital currency, when users bid with \$BID, the top 2 users after the bid ends will gain access to the PRED and BNB Predict Pools. The \$BID they bid with will be burnt immediately. While the users with the lower bid from the 3rd position can safely withdraw their bid and try again next week.

Apart from the Predict Pools, we will also be launching exclusive pools with high APR, where users can only again access by bidding with \$BID and staking with \$PRED to earn rewards.
