Predictcoin

Overview

Predictcoin is a crypto assets price prediction DAO, where users or "PREDers" can predict the price of crypto assets at a particular time, which would be visible and accessible to all. One question that's asked the most in the cryptosphere, is the price of a coin and when moon. Hence, Predictcoin, a platform that'll attract the best predictors to predict crypto assests and earn $PRED while at it. Users would get the first hand experience and see what experienced predictors think the market would look like for a particular coin in the next few days. Thereby learning more about the market and the experience.

Governance Token

$PRED is the governance token of Predictcoin and would be used to create user's profiles, predict on crypto assests and vote on community issues.

Tokenomics

The total capped supply of **$PRED** is **100,000** making it a deflationary digital currency.

Total Capped Supply 100,000

Initial Supply 30,000

20% (20,000) for IPO

10% (10,000) DEXs Liquidity

Remaining 70,000

60% (60,000)
earned through staking, farming & Pools.

5% (5,000)
locked for the Predict Pool

5% (5,000)
allocated to the team for further promotion/marketing.

65%
Farming & Pools

20%
IPO

10%

Team

Prediction V1

The version one of our prediction is the world's first crypto-assets price prediction DAO where winners & losers earn. Every week users can predict on 5 different coins on Predictcoin with PRED. Each coin has only 10 seats to accept predictions and each prediction costs 10 PRED, you can only predict once from one wallet. (This means only 50 seats available in total per week and 500 PRED retrieved). Those who try to predict after seats are filled will be unsuccessful and can withdraw their 10 PRED back anytime.

A position will open on Monday 13:00 UTC, and users can secure their seats by choosing either Bull or Bear (Up or Down). On Friday 13:00 UTC the positions closes, it's also worthy to note that the percentage of those who chose Up or Down will already be visible for the world to see. The ones with the right predictions will be redirected to stake PRED to earn PRED at a very high APR, while the ones who predicted wrongly will be redirected to stake PRED to earn BNB at a very high APR. Only the wallets they predicted with can stake.

The Predict Pool V1

The PRED (Predict Pool) APR would be so high that winners of the prediction should be able to get almost double of their PRED staked for that week. Yes, new week, new predict pools and you have to win your prediction to gain access for that week. Maximum stake per wallet is 100 PRED.

The BNB (Predict Pool) would be 1/5 of the APR of the PRED (Predict Pool). Meaning if the PRED pool starts at 100,000% APR, the BNB Pool would start at 20,000%. However, keep in mind that APRs can fluctuate depending on how many losers we have for that week and how much PRED were staked.

The BNB is a compensation to losers as we thank them for participating and keep trying. Maximum stake per wallet is also 100 PRED. Now you may ask, how are we getting the BNB for losers? The BNB needed for the first month is already available. However, welcome the Predict Bid.

The Predict Bid

We reckon the 50 seats will always be filled within seconds, because let's face it, anyone who got a seat will get value. And you can use several wallets to predict and secure your seats to increase your chances of earning more.

To give more people a chance, every month one user stand a chance to gain access to the main PRED (Predict Pool). All they need to do is bid with BNB, just like an auction. The highest bidder will be able to gain access to the Pool for a whole month (4 weeks).

The BNB the user bids with will be retrieved by us, while others with lower bids can safely withdraw their BNB and try again the next month. Bids starts at 1 BNB.

Prediction V2

PREDers would have up to 5 days to predict on various crypto assets by inputting the price it would be on a specific day/time (for example if it's on Saturday 11am UTC, then they have from Monday - Friday 7pm UTC to input their price prediction. Each coin would accept only 100 predictions. The PREDers with predictions closer to the actual price of the token would be ranked automatically & rewarded.

Prediction Rewards

1st: **30 points + 30% of the total deposited $PRED**
2nd: **20 points + 20% of the total deposited $PRED**
3rd: **15 points + 15% of the total deposited $PRED**
4th: **10 points + 10% of the total deposited $PRED**
5th: **5 points + 5% of the total deposited $PRED**
6th-10th: **4 points**
11th to 20th: **2 points**
21st to 100th: **1 point**

This is for each coin, the Price Prediction would keep adding more coins that can be predicted, more coins would be added later. PREDers can predict as many times as possible on all coins. As you can see, only 80% of the deposited $PRED would be distributed to the top 5, this is because 20% would be sent to the Predict Pool.
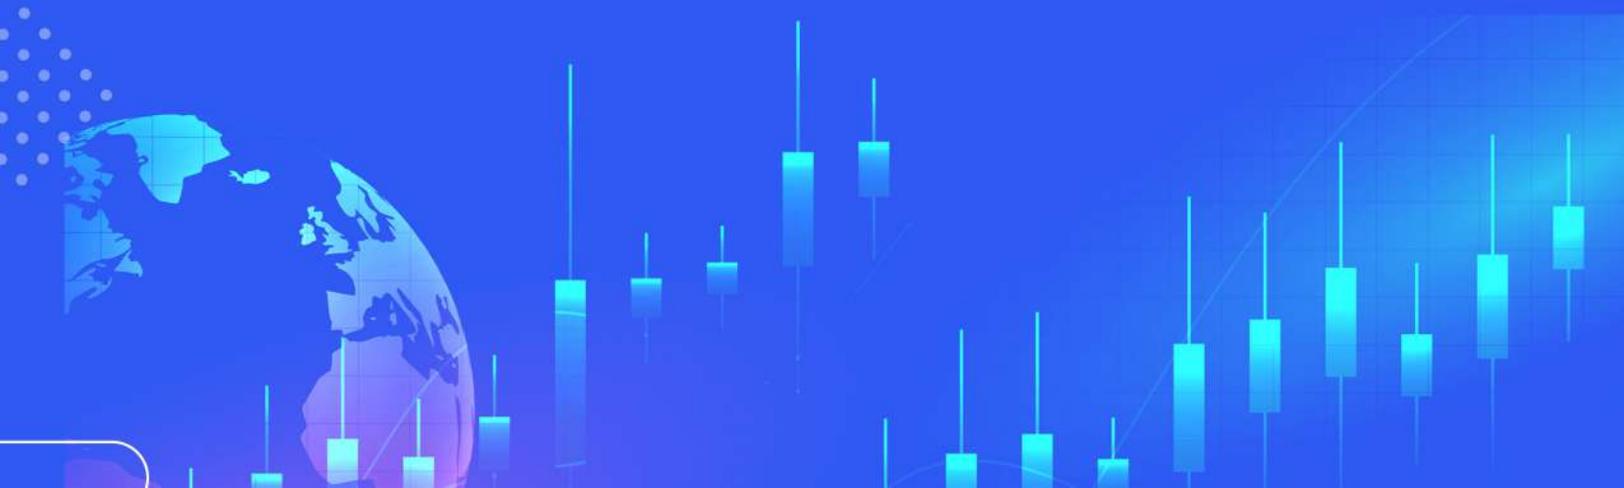

What is a Predict Pool in V2?

A Predict Pool is a pool on Predictcoin generating & distributing $PRED to winners of price predictions, stakers & farmers. Funded initially with 5,000 $PRED (see above in tokenomics), the predict pool would act as a backup plan or reserve for the price prediction and the whole Predictcoin ecosystem.

What are Points and why should I accumulate them?

Points are attributed to each PREDer's user profile, this distinguish the experienced PREDers that can predict the price of crypto assests and the ones with lower points who are still learning.

Newbie	**PREDer 0-99 points**
Amateur	**PREDer 100-199 points**
Junior	**PREDer 200-299 points**
Senior	**PREDer 300-399 points**
Professional	**PREDer 400-499 points**
Expert	**PREDer 500-599 points**
Veteran	**PREDer 600-699 points**
Master	**PREDer 700-799 points**
Ultimate	**PREDer 800-999 points**
Lord	**PREDer 1000 & above points**

Now you may ask, why should you try to get to Lord PREDer? Lord PREDers are our premium & experienced predictors. They get a 10% share of the whole Predict Pool monthly. Yes, for example, if at the end of the month there's 10,000 $PRED in the Predict Pool, Lord PREDers would share 1000 $PRED for free for doing nothing. If you're the first and only Lord PREDer, you get that all to yourself, call it a retirement plan.

Staking & Farming

Predictcoin is a deflationary cryptocurrency with only **100,000 total capped supply**. 60,000 has been reserved to be distributed through the:

1. PRED>PRED pool

2. PRED-BNB LP>PRED pool

3. PRED-BUSD LP>PRED pool

However, this would only last for about 2 years. What happens when the 60,000 $PRED runs out? The Predict Pool to the rescue.

Strong Usecase & Demand

The Predict Pool would be growing daily by

📊 User's profile activation costs: $PRED

📊 Each price prediction costs: $PRED

📊 Each vote on community issues costs: $PRED

These generated funds would be deposited into the Predict Pool. Lord PREDers would get to share 10% of the total pool monthly immediately & 90% reserved. When the 60,000 earned through staking & farming runs out, 90% of the Predict Pool would start being distributed into the PRED>PRED and PRED-BNB/BUSD LP>PRED pools monthly (automatically) & 10% distributed to Lord PREDers.

Football & Sports Partnerships

Predictcoin would also be marketed as the leading cryptocurrency to be used on predicting both crypto assests, football matches & sports games. Apart from partnering up with major sports predicting platforms, we would also work on developing in-house predicting features for sports games as well.

Problems We Are Trying To Solve

At Predictcoin, our goal is to help newbies and crypto traders have a clue about the market and learn more information about the green and red candles. We believe through our platform newbies would know and learn when to buy their favorite coins and when to sell, if they can study the experienced predictors on our platform.

Instead of going on Twitter and asking people you don't know if a coin will pump and dump, it's better you come to our platform and have a clue of what an experienced PREDer thinks the market would look like in the next 7 days for that particular coin.

We also believe the idea of minting new tokens to give APR, while also burning tokens doesn't make sense. To solve this problem, we would rather have a fixed supply, integrate more strong usecases to generate the token back & redistribute them to those staking & farming. This helps having a capped supply and maintaining a forever staking & farming system, although the APY might be lower when compared to other platforms.

NFT Bidding Marketplace

We are proposing PRED NFTs, exclusive NFTs only on Predictcoin. It's simple, bid $PRED earn NFTs, NFT hodlers issued on Predictcoin will be able to predict on all coins for that week only for free.
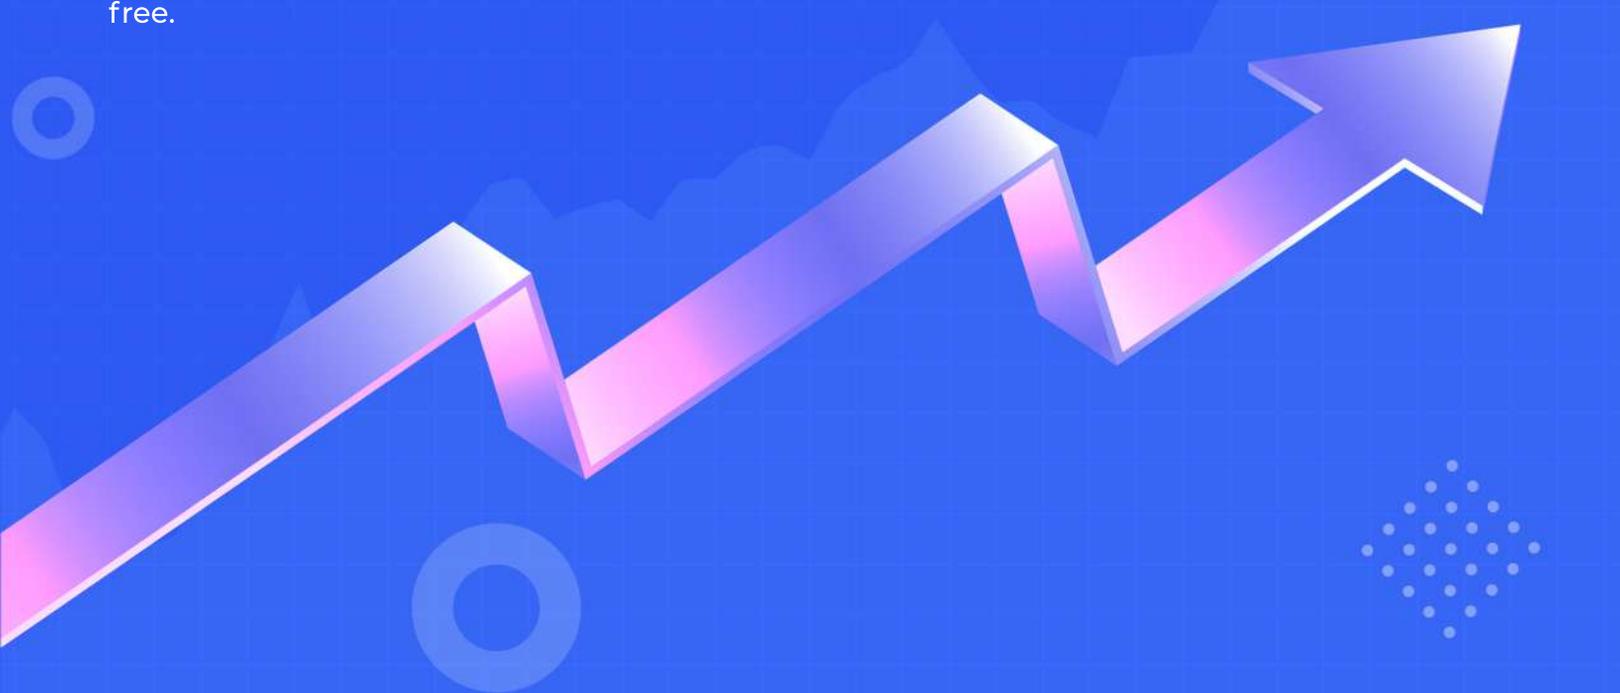

However, the more $PRED you stake, the higher your chances of getting the NFT for that week. Yes, new week, new NFT.

You bid on the NFT and if you're the highest PREDer with the most $PRED on the NFT pool, you win the NFT. This automatically unlocks the ability to freely predict on all coins for a week.

Roadmap

We have a lot to offer, and would be listening to our community while making necessary improvements, the development on Predictcoin is just beginning.

Phase 1: Platform launch

- Development of the site
- Launching officially on BSC
- Creating the bep-20 token ($PRED)

Phase 2: IPO

- Initial dex offering & Audits
- Building our userbase with incentives & heavy marketing
- Farming, Staking, Voting & Price Prediction launch on DApp

Phase 3: NFT Bidding Marketplace

- Integrating NFT on Predictcoin
- Price Prediction V2
- Cross-chain consideration

Phase 4: Push for Global Adoption

- Listing on major exchanges
- Football and Sports partnerships to make Predictcoin the number 1 currency used on major sports predicting platforms
- More developments
